GREEN MATTERS

OBJECTIVE

The objective of LAMOSA's Green Matters Initiative is to transform our business into a low-carbon emissions operating system capable of measuring and reducing our processes environmental impact. Green Matters focuses on the development of products and services that help our clients as they initiate their own sustainable construction projects.

VALUE FOR YOUR MONEY

Our ceramic tile's long use-life, durability and beauty are permanent features that increase your project's value.

SAFETY

Your family's safety is key. With LAMOSA, you can be sure that our ceramic tiles neither burn nor emit toxic vapors in case of fire.

HEALTHY CHOICE

LAMOSA ceramic tiles are remarkably easy to clean and keep clean. They do not accumulate dust, mites or bacteria.

ENVIRONMENTAL POLICY

Most of LAMOSA's installations have earned PROFEPA's (Mexico's Federal Prosecutor for Environmental Protection) "Clean Industry" designation.

REFORESTATION PROGRAMS

LAMOSA oversees reforestation projects in affected areas as part of its social commitment.

ECOLOGICAL MANUFACTURE

Recycled materials: Our production facilities use process materials, reuse technologies to avoid landfill disposal or the extraction of new raw materials. Our packaging is made of recycled - and recyclable- cardboard.

Resources reduction: We reuse a great deal of water and oven heat when we manufacture LAMOSA's products, to maximize natural resource performance.

Cogeneration: We have acquired two high-tech, turbine-based natural gas cogeneration systems that enhance operational efficiencies as well as generate electricity at their respective installations.

WATER RESISTANCE

As an impermeable material designed to offer superior traction, our ceramic tiles are the perfect option for swimming pools, showers, patios and other humid areas. They also resist humidity and mildew accumulation in low-ventilation areas.

SUSTAINABLE BUILDING THROUGH

LEED CERTIFICATION

LAMOSA products are the best ceramics option when construct sustainably. They make a real contribution to your LEED certification at the same time they comply to Mexican code.

- **SUSTAINABLE SITES**

LEED Credit SS 7.1 and 7.2. Heat Island Effect: When you choose our light - toned products for exteriors you are helping reduce the Heat Island effect, an undesirable by product of using absorbent materials that elevates ambient temperature and increases the energy needed to climatize structures.

- **INDOOR ENVIRONMENT QUALITY**

LEED Credit IEQ 4.3 Low-emissions materials: LAMOSA's ceramic tiles are constructed of inert materials that do not emit volatile and toxic organic compounds. Once installed, products can be utilised immediately - no ventilation periods required.

- **MATERIALS AND RESOURCES**

LEED Credit MR 5 Regional Materials: Our plants's geographical location throughout Mexico allow most of our products to be available within 800 km of the locations where clients need them, reducing transportation related pollution and spurring local economies.

LEED Credit MR 1.2 Construction Reuse: Given their durability, the reuse of ceramic wall tiles, floors and roofs during structure renovations can greatly contribute to earning this credit.

LEED Credit MR 3 Materials reuse: LAMOSA products can be recovered and relocated in new installations for different uses, e.g. decorative, mosaic-style patios and plazas.

- **ENERGY AND ATMOSPHERE**

LEED pre-requisite 2 Energy Performance: Due to their isolating and/or low-heat conductivity, our wall tiles help reduce overall structure energy consumption.

Ceramic tiles contribute to fulfilling Mexico's NMX-C-460-ONNCCE-2009 thermic isolators standard for buildings, a requirement for INFONAVIT's Green Mortgage.
